

Homeland Infrastructure Foundation-Level Data (HIFLD) Subcommittee

The Homeland Infrastructure Foundation-Level Data (HIFLD) Subcommittee is responsible for developing, promoting, and executing a coordinated strategy for acquisition and/or development of homeland infrastructure geospatial information for Federal agencies while creating and utilizing partnerships with State, Local, Tribal, Territorial, and private organizations.

HIFLD members represent Federal agencies that:

1. Collect or sponsor infrastructure geospatial information
2. Apply these data in support of homeland defense and homeland security missions

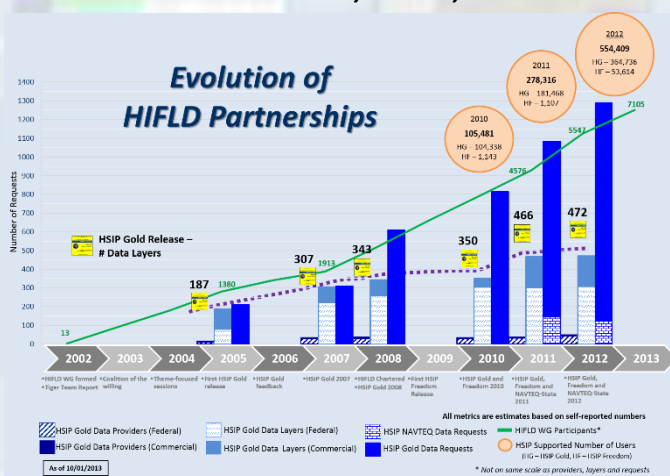

HIFLD's vast collaborative network includes:

- 7,100 mission partners
- 142 Federal Organizations
- 54 States and Territories
- 700 Private Sector Organizations

Features / Benefits

- HIFLD supports implementation of National Spatial Data Infrastructure (NSDI) initiatives via its alignment with the Federal Geographic Data Committee.
- HIFLD has held more than 62 infrastructure sector themed meetings nationwide to share information and best practices about geospatial information sharing, data, visualization and analysis.
- HIFLD leverages meetings and available Federal data sets to develop and promote a coordinated strategy to address the collection, processing, and sharing of the Homeland Security Infrastructure Program (HSIP) Gold, an aggregation of more than 568 layers of best available common operational infrastructure data from best available commercial data and 57 disparate Federal, State, Local and private sector organizations. HSIP Freedom is a subset of HSIP Gold, shared to State and Local governments without license restrictions. HSIP data has become the most used, useful, and usable common operational infrastructure data sets by over 550,000 supported users.
- HSIP data is currently the base map for multiple government supported geospatial viewers, applications, analytic tools, and other visualization capabilities. This model of good government has spurred additional requests for a regional HIFLD to focus on State and Local priorities and on issues to strengthen Federal, State, Local, and private sector partnerships across the Homeland Defense (HD), Homeland Security (HLS), National Preparedness – Prevention, Protection, Mitigation, Response and Recovery (NP-PPMR&R) mission communities.

Next Meeting:

June 3 – 4, Climate & Human Security Symposium Boulder, CO
